DETAILED ACTION

This action is in response to applicant's arguments submitted 13 November 2006.

Allowable Subject Matter

1. Claims 24-30 and 42-45 are allowed.
2. The following is an examiner's statement of reasons for allowance: Independents claims 24 and 42 require that the "the entire interior space defined by the outside diameter of the inner tube and the inner diameter of the outer tube is divided only by the first septum and the second septum" and secondly that "a plurality of third apertures formed through the outer tube." These two limitations were not found together, with the other limitations of the claims, in the prior art nor would they be obvious modifications. Various catheters show the interior space between the inner and outer tubes divided more by than *only* the first and second septum (Elkomer US 4,717,379), while other patents shown the outer tube terminating before a third aperture is made through the outer tube (Chin US 4,630,609). Due to the foreign priority claim of 22 December 1987, no prior was found which taught all of the limitations of claims 24 and 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

3. Claims 24 and 42 are allowable. The restriction requirement between Species I-VI, as set forth in the Office action mailed on 19 December 2002, has been

reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 30, and 43-45, directed to nonelected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
